

Complete Mobile App Integration Gives You Total Control

DAYTON, OH (March 27, 2019) – The Dayton Audio WFA400 4-Zone Wi-Fi Audio Receiver makes wireless, multi-room streaming easier than ever before. The WFA400 gives you total control over your whole home audio system right from your phone or tablet due to the mobile app integration.

The Dayton Audio WFA400's 4-channel design makes it a great solution for whole home distributed audio systems. Install in one central location such as an equipment rack or AV closet and control your entire audio system wireless via the Hi-Fly™ app.

The Dayton Audio Hi-Fly™ App turns your mobile device or tablet into a remote control for all Dayton Audio Hi-Fly™ enabled devices. Play music from your favorite streaming providers like Spotify, or from your home network or mobile device. With Hi-Fly you can send music to individual zones, or group your Hi-Fly™ enabled systems together for true multi-room audio. Plus, your music continues to play even if your phone is turned off or you need to take a call. The WFA400 is also compatible with Apple Airplay and DLNA for even more streaming flexibility.
